

State Sports Command Center — Deck Script

Opens with the PM Modi photo + quote — before the deck itself starts — then runs the same rhythm as the UNIV Sports booklet: the problem, the product, a feature-by-feature walkthrough, proof, and a close. Every dashed box below, photo or screenshot, names exactly what to drop in.

01 • WHAT THIS IS

The exact **words** for each slide, in the order they should run. No tech, no stack talk — just the story and the number that proves it.

02 • THE DASHED BOXES

Every **Capture** panel names the exact screen and what to crop. Open that route in the app, screenshot at 1600×1000, drop it in — nothing else needed.

03 • NUMBERS MARKED "ILLUSTRATIVE"

Any figure from the demo dataset (₹18.4 Cr, 28 academies...) is flagged **illustrative** — replace with the live figure the day a state signs on.

📷 PHOTO CAPTURE

A Prime Minister's Office / PIB press photograph of Narendra Modi at a sports or Khelo India setting — the same kind used in the reference booklet. Full-bleed, right-aligned, faded to the ink background on the left edge so the quote text sits over it legibly.

BEFORE THE DECK BEGINS

"When we talk about 2036 Olympics, we have to start preparing athletes now."

— NARENDRA MODI, PRIME MINISTER OF INDIA

Preparing athletes at Olympic scale is not a talent problem for Bharat — it's a visibility problem for the states running the academies. That's the gap this command center closes.

Government of Jharkhand, Department of Sports — The State Sports Command Center

Laying the foundation for a Digital Bharat's sports governance — one dashboard for every academy, every athlete, and every rupee.

Title card. Keep it to the wordmark, the line above, and the hero screenshot below as a full-bleed background with the text over a dark gradient — the same treatment UNIV used with its phone mockups on the cover.

📷 CAPTURE — HERO

/ (Command Overview)

Full-page grab of the home dashboard: greeting header, six-tile KPI row, and the Jharkhand map underneath. Use as a full-bleed cover image.

WHERE WE STAND TODAY

India's Olympic Reality, in Two Numbers

41

Total Summer Olympics medals, all-time (10 Gold · 10 Silver · 21 Bronze)

6

Medals at Paris 2024 (0 Gold · 1 Silver · 5 Bronze)

23

Youth Olympics medal tally, all-time (3 Gold · 4 Silver · 16 Bronze)

13

Best Youth Olympics showing — Buenos Aires 2018

For a country of 1.4 billion, that is not a shortage of talent — it's a visibility problem. The athletes exist, spread across thousands of academies and training centers that state sports departments run largely on paper: registers, printed circulars, and a WhatsApp group for urgent news.

What a State Sports Department Should Be Able to See

Age and identity fraud goes unnoticed until an athlete is disqualified at nationals. Kit and rations sanctioned for an academy leak somewhere between the warehouse and the athlete's plate. Scholarship money moves through spreadsheets with no audit trail. Coaches score their own athletes with no way to catch bias. And by the time a promising athlete quietly drops out, months of state investment are already gone.

None of this is one department's fault — it's a visibility gap. No single screen shows the Director all five problems at once, early enough to act.

📷 CAPTURE

/ (Command Overview)

Crop tight on the interactive Jharkhand district map and the KPI row above it — **Active Athletes, Academies Compliant, Funds Disbursed, Open Fraud Alerts.**

One Command Center, Nine Pillars of Oversight

01

Real-Time State Map

Every district, academy and PEC on one live map.

02

Anti-Fraud & Identity

Age & residency sealed once, evaluator bias flagged automatically.

03

Resources & Assets

Kit and ration custody tracked warehouse to plate.

04

Financial Controls

Direct benefit transfers and fund releases, fully traceable.

05

Athlete Welfare

Dropout risk flagged from attendance, weeks in advance.

06

Load & Recovery

Wearable data catches overtraining before it becomes injury.

07

Academies & PECs

Every facility scored and searchable by district and sport.

08

Unified Alerts

Every red flag, from every pillar, in one severity-graded feed.

09

Medical

Fitness certificates and injury/clearance history on every athlete's profile.

Icon-grid slide, no screenshot — mirrors the UNIV "Our Features" page.

Built for the Full Chain of Command

State Sports Dept.

Director-level view across every district — the command seat this deck is designed for.

District Officers

Ground-level compliance entry and academy-level accountability.

Academies & PECs

40 facilities under one oversight standard — same scorecard, same thresholds.

National Federations

A clean feed into Khelo India and national talent pipelines. National Sports Act 2025 will be incubated here.

📷 CAPTURE

/academies

The Academies & PECs grid — show the district/sport filters and 3–4 facility cards with their compliance status badges.

Catching Fraud Before It Becomes a Scandal

Age and residency fraud has quietly ended careers at national trials for years — usually discovered after the fact. Here, identity is sealed once, at registration, through DigiLocker, and stays sealed. And because a coach's subjective score is automatically checked against the athlete's objective trial result, evaluator favoritism shows up as a flag on a chart — not as a rumor in a corridor.

 CAPTURE

`/integrity`

Top: the Verified / Pending / Flagged identity queue tiles. Bottom: the evaluator de-biasing scatter chart.

Following Every Kit and Every Meal to the Athlete

Procurement is tracked from the state warehouse, to the academy store, to a biometric receipt signed by the athlete themselves — closing the exact gap where kits and rations have always gone missing. Meals billed by a mess are checked against biometric check-ins, so leakage shows up as a number, not a suspicion.

 CAPTURE

[/resources](#)

The chain-of-custody funnel (Warehouse → Academy → Athlete) plus the "plates billed vs. biometric check-ins" chart.

Money That Moves in the Open

Every direct benefit transfer to an athlete's bank account is tracked transfer by transfer — paid, in-transit, or failed. Academy funding holds at a compliance threshold until the academy clears it, and every funded academy is graded on the return it delivers for the money it received.

📷 CAPTURE

`/finance`

The Transfer Status donut, the Funds Active / On Hold tiles, and a few rows of the DBT ledger table.

Catching a Dropout Before It Happens

Biometric attendance trending downward is the earliest tell that an athlete is about to leave the system. This surfaces that athlete to the Director weeks before the exit — with a likely reason already attached, so the intervention is a phone call, not a post-mortem.

 CAPTURE

/welfare

Retention-rate KPI tile, the Monthly Exits trend chart, and 2–3 rows from the at-risk athletes queue.

Preventing the Injury Before It Ends a Career

Wearable data — heart-rate variability and training load from Firstbeat, muscle load and left/right asymmetry from Myoact — flows straight into the command center. A coach sees overtraining risk building days before it becomes a torn hamstring, instead of finding out at the physio's table.

📷 CAPTURE

/monitoring

The fleet physiology view — recovery score and fatigue index tiles across a handful of athletes.

Every Red Flag, One Feed

A fraud flag from Integrity, a leakage flag from Resources, a missed transfer from Finance, an at-risk athlete from Welfare — all of it lands in one severity-graded feed. The Director's morning starts with what actually needs a decision, not five separate logins.

 CAPTURE

`/alerts`

The Alerts Center feed, filtered to show a mix of severities and pillars (Critical/High tags visible).

HOW IT WORKS, END TO END

The Oversight Loop

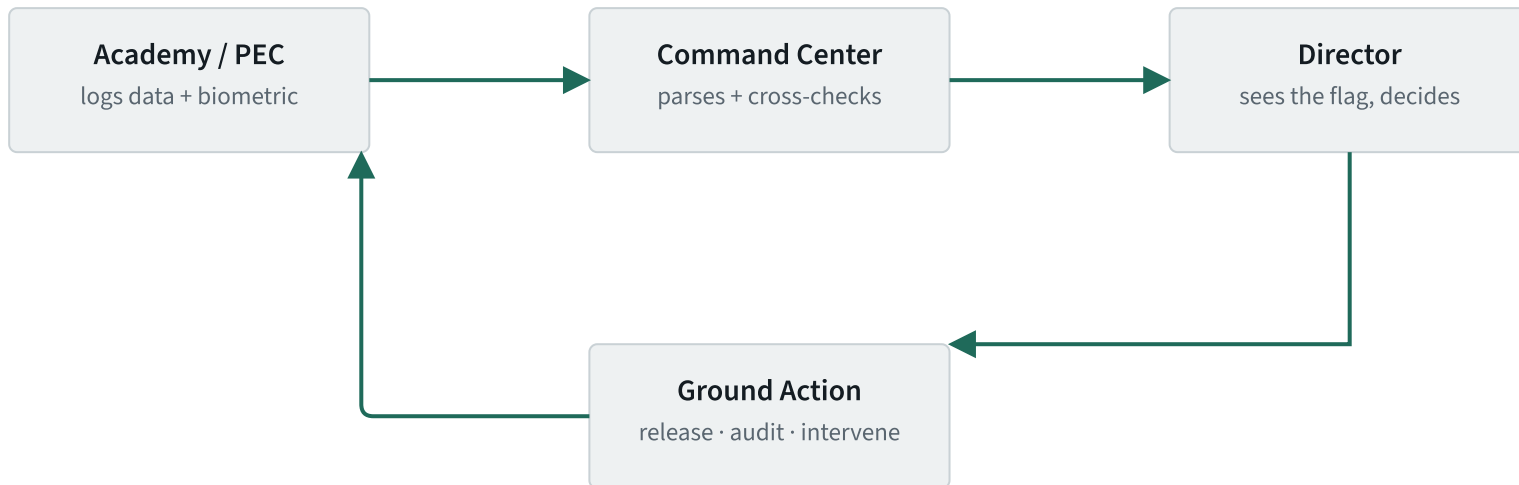

Diagram slide, no screenshot — mirrors the UNIV "circular flow" page. The loop is the pitch: nothing here dead-ends in a spreadsheet.

Every Order Carries the Department's Name

Every report, export and signed order carries the department's verified identity. Escalation thresholds — what counts as a critical alert, at what compliance score funding pauses — are configured by policy, not buried in code, so the Director's own rules decide what gets flagged.

 CAPTURE

</settings>

The organisation profile card (with the "Govt. verified" badge) and the compliance & escalation thresholds panel.

Designed for State Scale, From Day One

40

Facilities on one view — 28 academies + 12 PECs

₹18.4 Cr

Funds tracked through DBT, FY 2025–26

4

Critical fraud alerts caught this cycle, before payout

6

Oversight pillars, one login

These four figures are from the working demo dataset. Swap every one for the live number the day a state signs on — that's the whole point of the slide: it's a template for a real KPI row, not a claim of traction yet.

CLOSING

If Bharat is serious about 2036, it has to be serious about knowing where every rupee, every athlete and every academy stands — today, not at audit time.

The State Sports Command Center — the operating layer under India's Olympic ambition.

Deck script for internal use — build the real slides in your deck tool of choice, taking one screenshot per dashed capture frame above.
