

SPORTS GOVERNANCE • PROJECT PROPOSAL

State Control Command Center

One verified record for every athlete, academy and rupee — identity checks, kit and diet reconciliation, funding compliance and athlete welfare on a single screen for Tamil Nadu's sports programme.

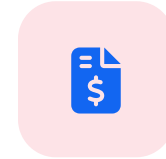

Tamil Nadu — Chennai command hub • 38 districts

Many schemes, one athlete — and no single view across them

No single athlete record

Hostels, academies, centres of excellence and talent-development centres each hold part of an athlete's story.

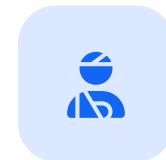

Funds follow claims

Releases rest on periodic returns — hard to verify facility by facility, and in time.

Leakage found late

Kit, diet and stipend mismatches surface at audit, not at the point they occur.

Welfare signals surface late

Injuries, return-to-play decisions and dropouts are noticed after the season, not during it.

What the system sets out to do

One record, for life

Give every athlete a single verified record that follows them across schemes, academies and postings.

Funds follow compliance

Release and hold money against a live compliance score, not a paper claim.

See the whole state, same day

Every district and facility on one screen — today's picture, not last month's return.

Catch welfare risks early

Flag injuries, overload and falling attendance while there is still time to act.

Every facility in the state, one command screen

TAMIL NADU

38 districts, every programme, one command screen

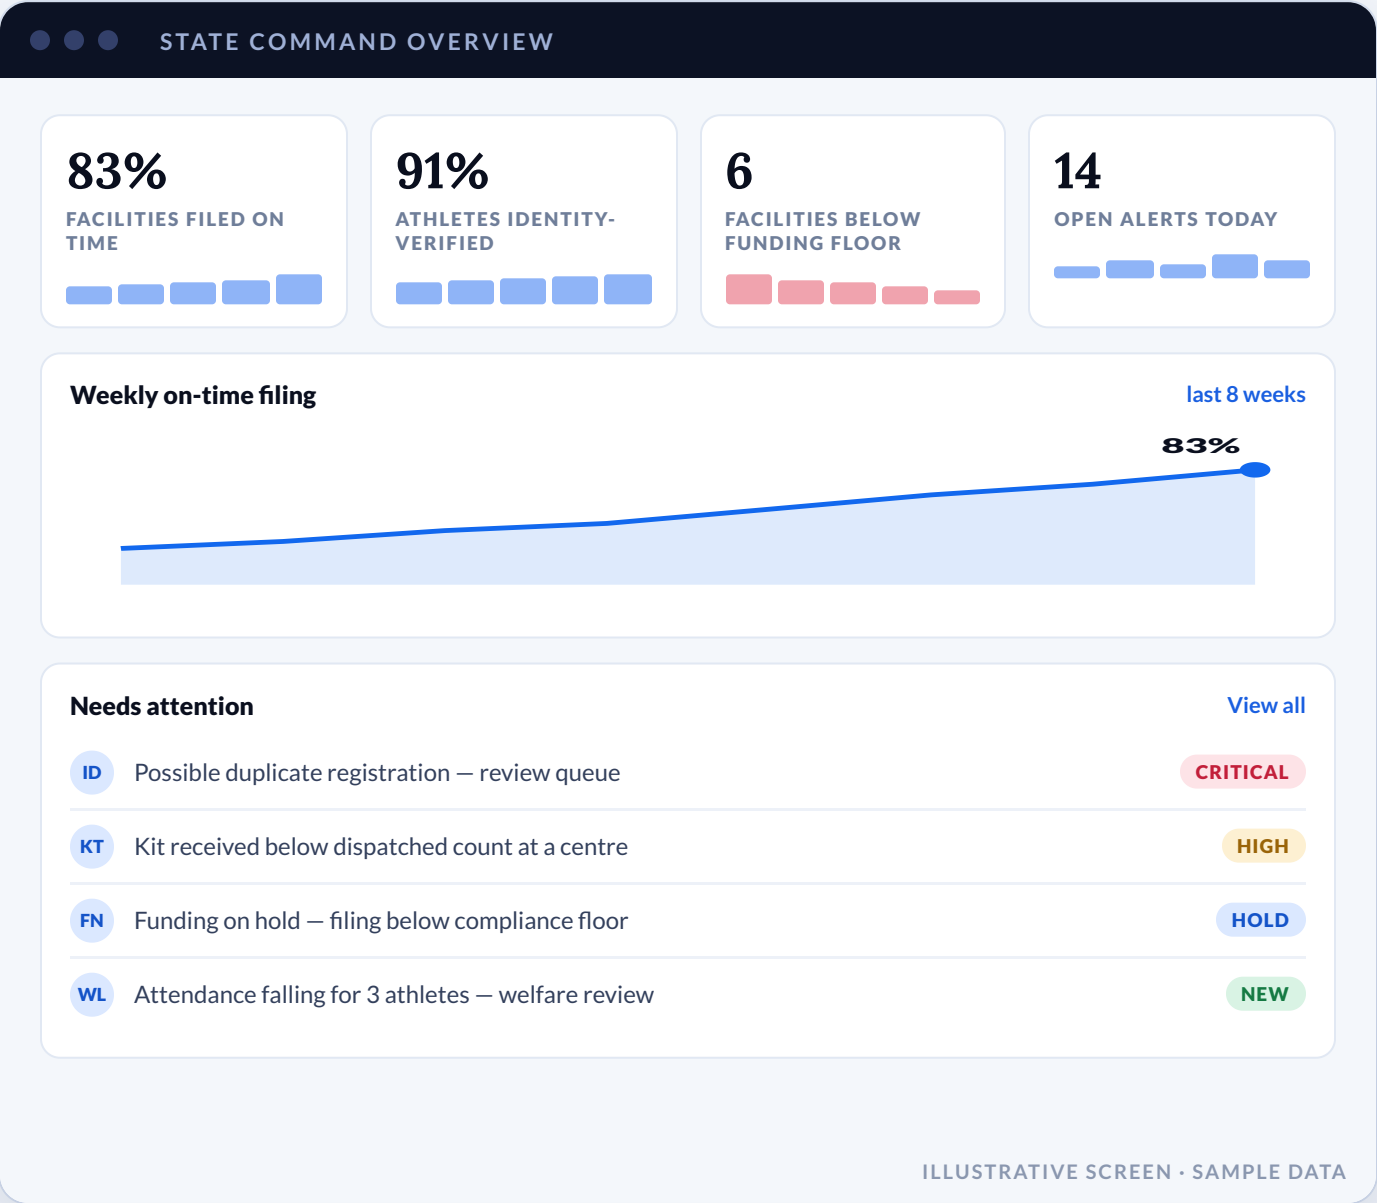

- Sports hostels
- Academies
- Centres of excellence
- Talent-development centres
- Joint sports development centres in colleges

Command room in Chennai, linked to the Sports Development Authority of Tamil Nadu (SDAT).

- In-scope: athlete records, identity checks, kit and diet tracking, funding compliance, welfare and injury clearance
- All 28 SDAT sports hostels and every academy and centre, linked to its district sports office
- Role-based access: athlete, centre executive, district sports officer, medical officer, SDAT head office
- Designed to work alongside existing state portals, DBT and DigiLocker
- Phased rollout: pilot centres first, then statewide standardisation

The command screen — the whole state, at a glance

1

The whole state, one page

Every district's facilities, compliance and alerts load together, the moment the Director logs in.

2

Compliance you can rank

Facilities are scored on weekly filing — the bottom of the list is visible, not buried in a report.

3

Alerts in one feed

Fraud, funding and welfare flags land together, tagged by severity, ready to action.

4

Drill down in a click

From state to district to centre to a single athlete's record, on the same screen.

Built around one athlete, one record, for life

Verified athlete identity

Age and identity are sealed once, and duplicate registrations are flagged the same day.

Kit & diet reconciliation

Kit and rations are tracked from warehouse to centre to athlete, billed against verified check-ins.

Funding on compliance

Releases are tied to a live compliance score; below the floor, money is held and the reason is on record.

Injury clearance lock

No return to play without medical clearance — any override attempt is flagged.

Welfare & dropout alerts

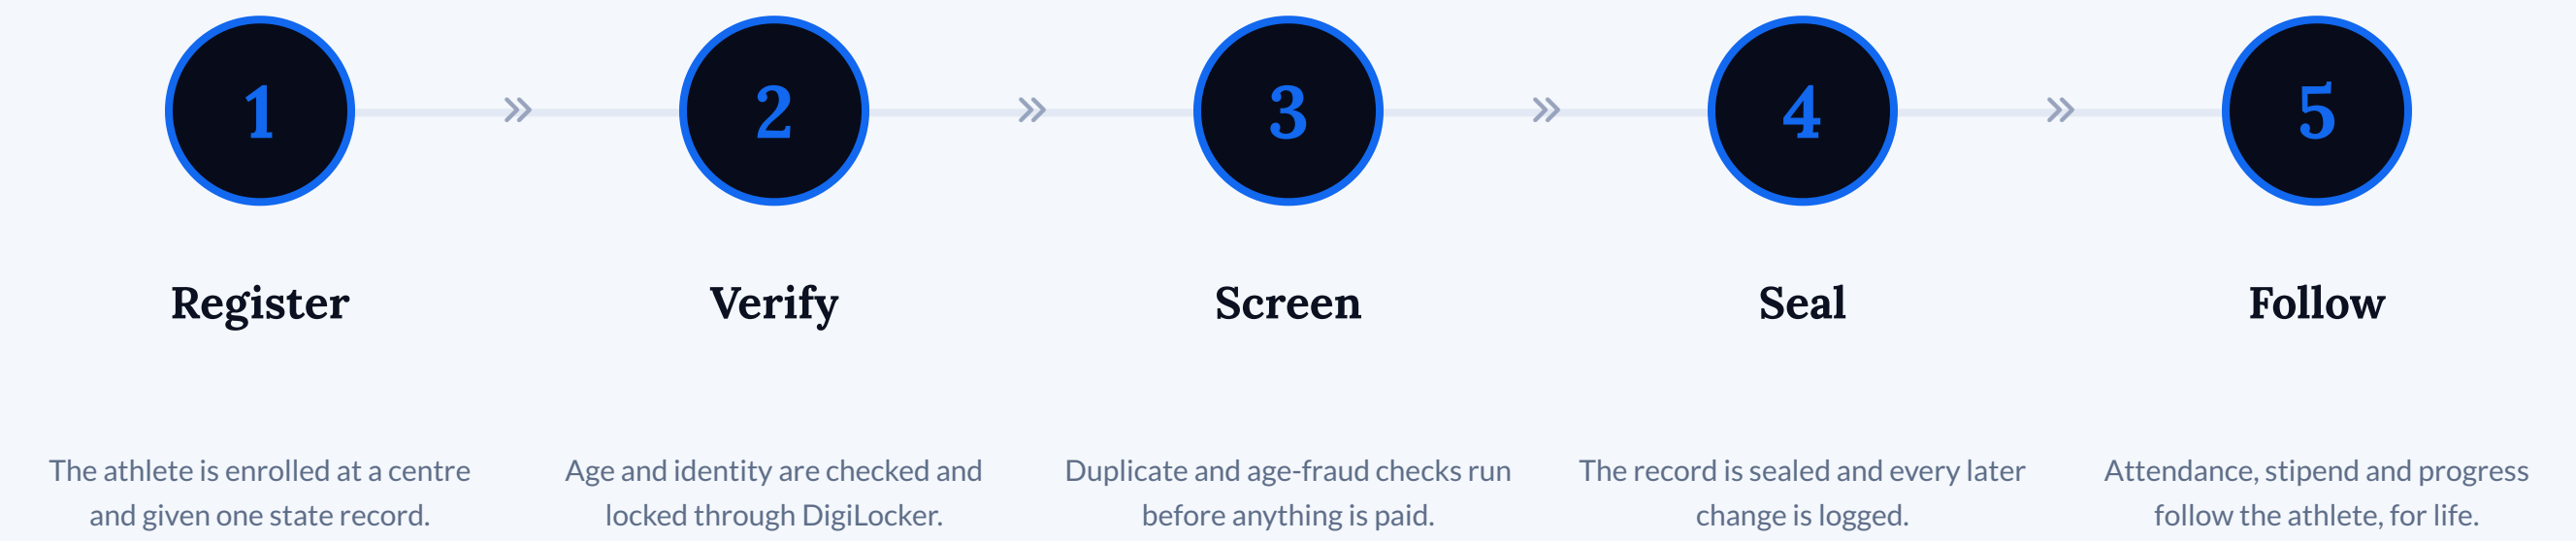

Falling attendance and overload surface weeks before an athlete leaves the programme.

Streaks & recognition

Centres and athletes earn badges for on-time filing and consistency, keeping data fresh.

How an athlete is verified – once

RESULT One verified record per athlete – no duplicates, from district trial to national selection.

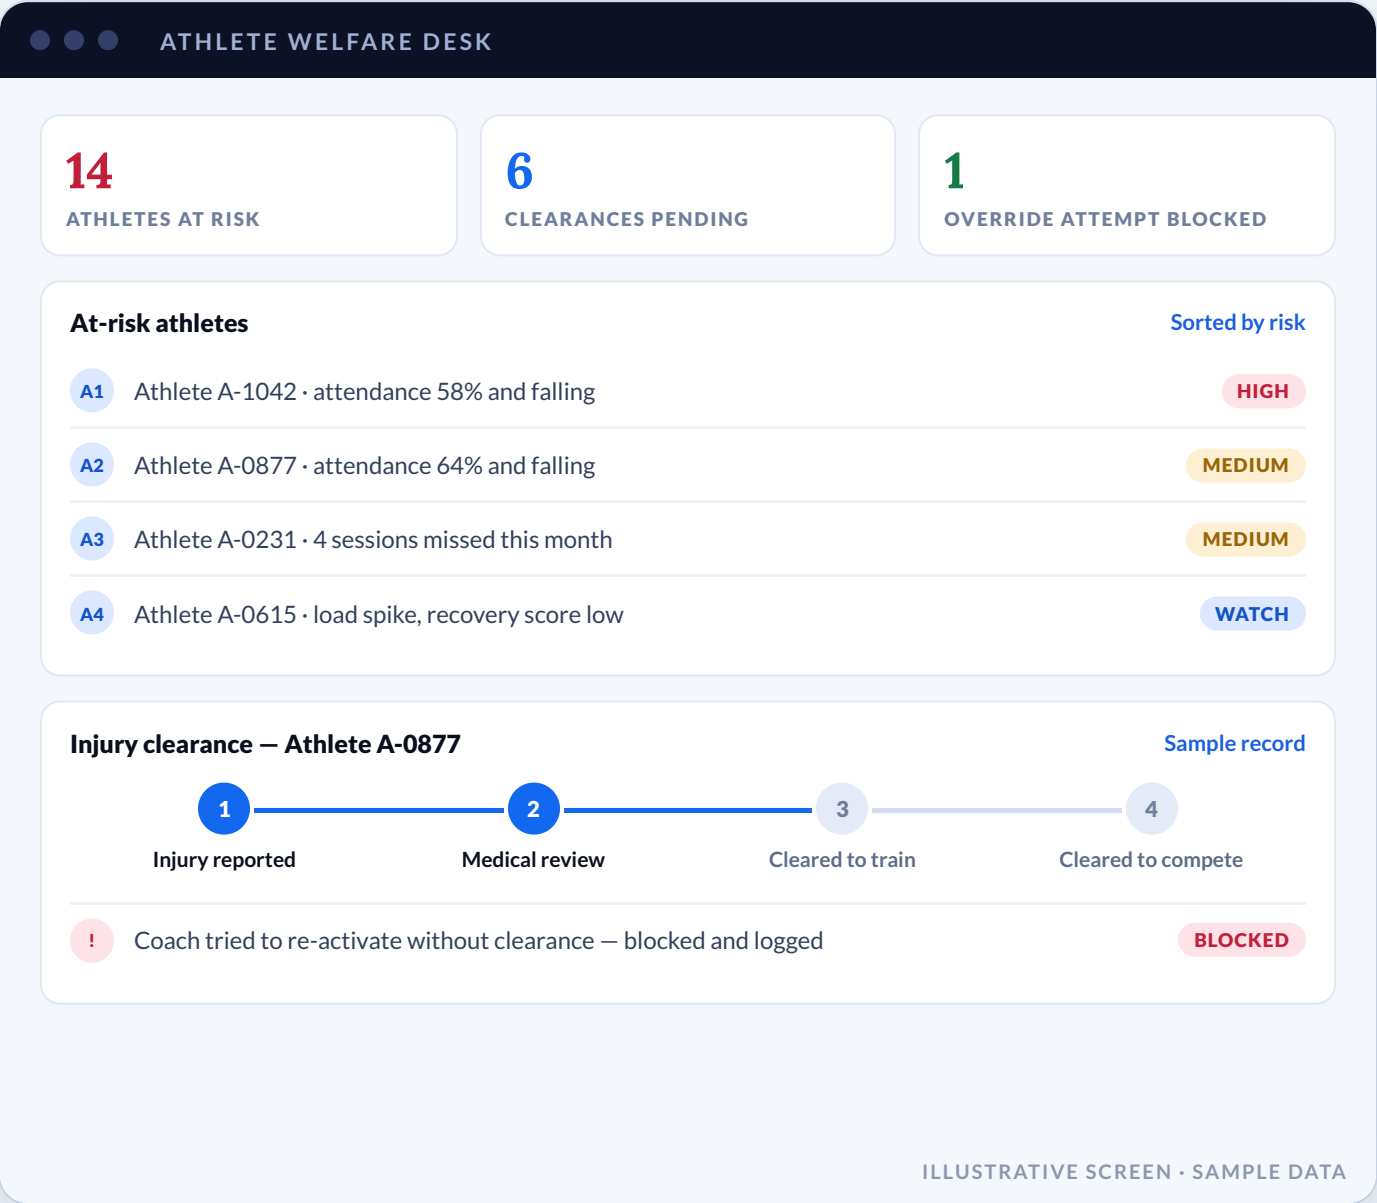

How a funding release is decided

RESULT *Money follows verified compliance — not paper claims — and every decision can be audited.*

The welfare desk — catch risk before it becomes a loss

1

Early warning, not exit interview

Falling attendance and overload are flagged while the athlete is still in the programme.

2

Clearance you can't skip

An injured athlete cannot be re-activated without medical sign-off — the attempt itself is logged.

3

One page per athlete

Attendance, injuries, load and recovery sit together, so a decision is made on the full picture.

4

Ready to act

The medical officer and district officer see the queue each morning and close cases from the same screen.

What changes for athletes and for command

38

DISTRICTS, ONE COMMAND SCREEN

Same-day

FACILITY DATA, NOT MONTH-END

COMPLIANCE SCORING & ALERTS

1 record

PER ATHLETE, FOR LIFE

- **No duplicate registrations**

Identity is sealed once, so one athlete cannot draw two scholarships.

- **Funding with a reason on record**

Every hold and release traces to a compliance score anyone can audit.

- **Welfare caught early**

Dropout and injury signals surface through routine data, not a crisis.

- **Less time on returns**

Centres file once, weekly; the state stops chasing paper month-end reports.

Who uses the system, and how

Athletes

Sees their own record, stipend status and badges — one profile across schemes.

Centre Executive

Logs daily attendance, kit and ration receipts, and files the centre's weekly return.

District Sports Officer

Tracks district compliance, schedules inspections and clears escalations.

Medical Officer

Records injuries, issues return-to-play clearance and follows up flagged athletes.

SDAT Head Office, Chennai

Sees every district on one screen, ranks programmes and decides funding holds and releases.

Next Steps

- Confirm pilot centres — a hostel and an academy in each pilot district — for the first rollout phase
- Digitise existing registers, rosters and scheme files where available
- Run a supervised pilot through one full funding cycle, then expand
- Hand over with training for centre executives, district officers and medical officers
